Phase 1 — MVP: What We Build Now

A complete, working recruitment portal, delivered in about 5 weeks. Everything below is included in Phase 1.

1. Public website — all 7 pages + Jobs listing

- Home, About Us, For Candidates, For Employers, Contact, Privacy Policy, and Terms of Use
- Public Jobs listing - open roles displayed; candidates browse & filter by sector, city and experience

2. Candidate portal

- Registration & login with a guided profile builder (personal details, skills, experience, career summary, notice period)
- Salary expectations captured but kept private from employers
- Browse and apply to open roles after the admin approves the profile
- Track every application's status: Applied → Under Review → Shortlisted → Interview → Decision

3. Employer portal

- Company registration & login, verified by the admin team before any posting is allowed
- Job posting form - required skills, experience range, role description, and a confidential salary band
- Per-opening applicant list, sortable by status, with profile and resume view

4. Admin dashboard

- Approve or reject candidate profiles, employer accounts, and job postings before they go live
- Manage the applicant pipeline per opening and coordinate interviews between both parties
- Simple stats: total candidates, total employers, total open jobs, total applications

5. Notifications

- In-portal notification - users see every update when they log in

6. Hosting & go-live

- Full server setup, domain configuration, SSL certificate, and deployment on DigitalOcean
- Complimentary post-launch support for the first year

Phase 2 — Future Enhancements

Each feature below can be added later as a separate phase once the platform is live and real usage guides priorities.

Phase 2 is priced separately.

1. AI Matching Engine

- Automated matching that scores every candidate against every open role in the background
- Considers skills (with semantic understanding), experience, career summary, salary, notice period and location
- Admin-only match scores and breakdowns, never shown to candidates or employers

2. Email & WhatsApp Notifications

- Outbound alerts at every key event - application received, shortlisted, interview confirmed, offer made
- Sent on top of the in-portal bell, so users are reached without logging in
- Adds a small per-message running cost (email and WhatsApp), quoted at that time

3. Full Metrics Dashboard

- Platform analytics beyond simple counts: time-to-shortlist, time-to-hire, offer acceptance rate
- Pipeline drop-off by stage, applications per job, and stale-candidate re-engagement flags

4. Kanban Pipeline Board

- Drag-and-drop candidate pipeline per opening (New → Reviewing → Interview → Decision)
- Replaces the simple sortable list with a visual board

5. Smart Document Reading - Optional

- AI pre-fill — a candidate's CV is read on upload and their profile fields are suggested automatically
- An employer's job description document is read and the posting form is pre-filled for review

> **How Phase 2 works:** each item is optional and independent — you can take any subset, in any order. Both the build cost and any additional running cost are quoted separately when the phase is planned.

Phase 1 — Costing

Portal development - Phase 1 MVP, delivered in ~5 weeks

₹55,000

Payment terms

When	Amount	Share
Advance - on confirmation	₹15,000	~27%
On completion - within 7 days of go-live	₹40,000	~73%

Annual maintenance (from year two)

Item	Basis	Amount
First-year support	Included	Complimentary
Annual Maintenance Contract (AMC)	18% of project cost	₹9,900 / yr

> AMC covers bug fixes, security updates, server and database monitoring, regular backups, and minor text or label adjustments. New features and Phase 2 items are quoted separately.

Server & Running Costs

Billed directly to BK Talent Acquisition for transparency, separate from the development fee. With no AI, email, or WhatsApp services in Phase 1, running costs are fixed and minimal.

Fixed monthly costs

Item	Provider	USD / Month	Notes
Server	DigitalOcean	~$6	1 vCPU · 1GB RAM · handles ~500 active candidates · upgrade to $12 at scale.
Domain	Hostinger/GoDaddy	~$1	bktalentconnect.com · billed annually, ~$12/yr
Total fixed			**~$7 / month**

- The fixed monthly costs are direct costs of these services. These will be directly paid by BK Talent Acquistion for full transparency.
- These costs mentioned are **excluding GST, currency exchange** and any other charges on top of this.

Terms and Conditions

These terms apply to the software development and maintenance services provided by Takai Labs to BK Talent Acquisition and Advisory in connection with this proposal.

1. Delivery

The software will be delivered electronically and made accessible via a live web server on a mutually agreed domain. No physical media or installation is required on the client's premises.

2. Payment

Payment shall be made in two instalments: an advance of ₹15,000 (~27%) upon confirmation of this proposal, and the remaining ₹40,000 (~73%) within seven (7) days from the date of go-live and handover. All software charges are strictly non-refundable and non-transferable once work has commenced.

3. Post-Launch Support

Complimentary online remote support will be provided for one (1) year from the date of go-live. This covers bug fixes, minor issues, and platform monitoring. Support is provided remotely.

4. Annual Maintenance Contract (AMC)

From the second year onward, ongoing support and maintenance will be provided under an Annual Maintenance Contract charged at 18% of the original software cost (₹9,900 per year), billed annually. In the absence of an active AMC, support will be available on a per-session basis at ₹6,200 per session.

5. Data and Database Responsibility

Takai Labs shall not be held liable for any loss, damage, or corruption of data stored on the server. Potential causes include, but are not limited to, unexpected server shutdowns, hardware failures, hard disk malfunctions, viruses, malware, or other unforeseen technical events. The client is advised to maintain independent backups of critical data. Under the AMC, Takai Labs will configure and monitor regular automated backups as part of the service.

6. Scope of Work

The software will be developed as described in this document. Any additions, modifications, or new features requested beyond the agreed Phase 1 scope — including all Phase 2 items — will be assessed and quoted separately.

7. Intellectual Property

Upon receipt of the final payment, all source code and project assets developed under this agreement will be transferred to the client. Until final payment is received, all intellectual property remains with Takai Labs.

8. Confidentiality

Both parties agree to treat the contents of this document, the project details, and any business information shared during the course of the project as confidential, and not to disclose it to third parties without prior consent.

9. Third-Party and Operational Costs

All costs related to hosting and continuous operational services — including but not limited to the cloud server (DigitalOcean), file and document storage, and domain registration and renewal — are not included in the development fee and shall be borne directly by the client. Takai Labs shall not be held responsible for any changes in pricing by third-party service providers, nor for any additional charges arising from applicable taxes or currency conversion rates.

10. Governing Law

This agreement shall be governed by and construed in accordance with the laws of India. Any disputes arising from this agreement shall be subject to the jurisdiction of the courts in India.
