TAKAI LABS

BK Talent Connect

Portal Design & Workflow Proposal

bktalentconnect.com

Prepared for

BK Talent Acquisition and Advisory

Overview

A managed recruitment portal connecting technical professionals with hiring companies across India's industrial sectors led end-to-end by the BK Talent Acquisition & Advisory team.

CANDIDATE	EMPLOYER	ADMINS
Registers · builds profile · awaits admin approval · applies to jobs · tracks application progress	Registers · awaits admin approval · posts openings · reviews candidate pipeline · makes hiring decisions	Approves accounts · oversees all activity · uses AI insights · recommends candidates to employers

Website Pages

The portal consists of public-facing pages accessible to all visitors, and authenticated portals for each user type.

PUBLIC PAGES

Home
Portal introduction, Our story, sectors served, CTA buttons to register as candidate or employer. WhatsApp contact button pinned at bottom right.

For Candidates
How the portal works for job seekers. Benefits of registering with us, sectors covered, registration call-to-action.

For Employers
How the portal works with hiring companies. Advisory approach explained, posting inquiry form, WhatsApp contact. Employer registration CTA.

About US
Founder profile and background, advisory philosophy, industry experience, sectors served, personal touch approach that differentiates us.

Contact
Email enquiry form, WhatsApp link, LinkedIn page link. WhatsApp button is persistent across all pages.

Jobs (Optional)
Searchable list of Anonymous open roles. Filter by sector, city, experience level. Each card shows title, sector, city, experience required, and a one-click Apply button.

AUTHENTICATED PAGES (LOGGED IN)

Candidate Login / Register
Separate entry point for candidates. After registration, guided to profile builder. After login, goes to candidate dashboard.

Employer Login / Register
Separate entry point for hiring companies. After registration, account pends admin approval. After login, goes to employer dashboard.

Admin Login
Private admin team login. No public registration. Leads to the full admin dashboard with all platform controls and AI match data.

LEGAL & UTILITY PAGES

Privacy Policy
How candidate and employer data is stored, used, and protected. DPDP Act compliance. Salary and salary data handling. Data deletion requests.

Terms of Use
Acceptable use for candidates and employers. Our role as an intermediary. Limitations on direct employer-candidate contact outside the platform.

1. Candidate Workflow

> Admin Approval Gate: Candidates cannot see any job openings until admin has reviewed and approved their profile.
>
> This ensures only verified, quality candidates view all jobs and apply to them.

Application pipeline (candidate view)

Email + WhatsApp + portal bell notification fired at every stage change.

Candidate profile fields

Section	Field	Req.	Notes & AI Impact
Basic	Full name	Yes	-
	Email	Yes	Login + all notifications
	Mobile number	Yes	WhatsApp notifications
	City, State	Yes	Location scoring - 7 pts
	Open to relocation	Yes	If Yes, city mismatch doesn't eliminate in AI Stage 1
Professional	Current job title	Yes	e.g. Senior Process Engineer
	Current employer	No	Optional
	Years of experience	Yes	Core input - experience scoring 25 pts
	Sector	Yes	Dropdown (Engineering, Pharmaceuticals, Sales etc.) · single select · must match job sector for Stage 1 pass
	Skills	Yes	(Java, Autocad etc.) Min. 3 tags · semantically matched against job skills - 35 pts
	Education level	Yes	Diploma / B.E. / B.Tech / M.Tech / MBA / PhD
	Qualification + year	Yes	Degree name and specialisation
Career history	Previous roles	Yes	Company · title · years · domain tags
	Key achievement	No	One line per role - optional
Career summary	Free-text paragraph	Yes	Min. 150 chars · embedded as vector · matched vs job description - 15 pts
Availability	Notice period	Yes	Immediate / 15 / 30 / 60 / 90 days - notice scoring 8 pts

	Current salary (CTC)	**Yes**	Private - admin + AI only. Never shown to employers.
	Expected salary - min	**Yes**	Private - compared to employer salary band - 10 pts
	Expected salary - max	**Yes**	Private - compared to employer salary band - 10 pts
	Employment pref.	**Yes**	Full-time / Contract / Open to both
Resume	PDF or DOCX	**Yes**	Stored securely · visible to admins + employers after shortlisting
LinkedIn Profile	URL	**No**	Optional link to LinkedIn Profile

2. Employer Workflow

Employer registration fields

Field	Notes
Company name	-
Industry sector	Dropdown · single select · required - Engineering / Pharma / Manufacturing / Machine Building / Operations / Lab / Drafting
Locations	Primary hiring locations
Company website	Optional
Primary HR contact	Name, email, phone
LinkedIn company page	Optional
Company introduction	Shown to candidates on the company profile page

Job opening fields

Section	Field	Notes & AI Impact
Role basics	Job title	e.g. Senior Process Engineer
	Department	e.g. Production, Quality, R&D
	Number of positions	-
	Sector	Dropdown · single select · required. Used as hard filter in AI Stage 1.
	City	Job location - location scoring 7 pts
	Work type	On-site / Hybrid / Remote
Requirements	Required skills	Min. 3 - carry 28 of 35 pts in AI skills scoring
	Good-to-have skills	Optional - carry remaining 7 pts in AI skills scoring
	Min experience (yrs)	AI experience scoring 25 pts
	Max experience (yrs)	AI experience scoring 25 pts
	Education requirement	Diploma / B.E. / B.Tech / M.Tech / Any
Role description	Responsibilities + context	Min. 100 words · embedded as vector · matched vs candidate summary - 15 pts
	Target joining date	Compared vs candidate notice period - 8 pts
Salary (private)	🔒 **Salary band minimum**	Never shown to candidates · AI salary scoring 10 pts
	🔒 **Salary band maximum**	Never shown to candidates · AI salary scoring 10 pts

Employer Kanban pipeline (per job opening)

NEW	REVIEWING	INTERVIEW	DECISION
All candidates who applied + recommended ones pinned at top with badge. Employer can view profiles and resume.	Employer reading profiles actively. Can request an interview or mark candidate as not suitable.	Admin/Company schedules and confirms with both parties. Interview details sent to both. Reminder 24 hrs before.	Employer marks: Offer Made or Not Selected. Admin and candidate notified immediately on either outcome.

- No AI scores shown to employers - candidates listed by application date only
- Admins Recommended candidates pinned at top with a "Recommended by Us" badge
- All candidate contact is routed through admins - employers cannot reach candidates directly
- Admin is notified immediately on every employer action in the pipeline

3. Admin Dashboard

The operational centre for the admin team. Full visibility across all platform activity. AI match scores and breakdowns are visible only here - never to candidates or employers.

Approve / Reject
Profiles and accounts

- Candidate profiles before portal access
- Employer accounts before any posting
- Job postings before going live

Recommend
Bidirectional picks

- Pin candidate to job - Recommended by Us badge
- Pin job to candidate - top of feed
- Bypasses AI ranking - manual curation

Full AI Scores
Admin-only visibility

- Score 0–100 per candidate per job
- Which skills matched or missing
- Salary gap flagged in numbers

360° Candidate
Complete history view

- All applications + AI scores
- Rejection patterns and reasons
- Salary vs employer budgets

360° Job Opening
All applicants ranked

- Full pipeline status (Kanban)
- AI fit score for every candidate
- Admin notes and recommendations

Metrics Dashboard
Platform health at a glance

- Time to shortlist / hire
- Offer acceptance rate
- Drop-off by pipeline stage

Platform metrics tracked

Category	Metric	What it tells Us
Speed	**Time to shortlist**	Our response speed - target under 3 days from application
	Time to first interview	Pipeline speed from application to scheduled interview
	Time to hire	Full cycle duration per role from application to offer
	Employer response time	Days from shortlist to employer taking any action
Quality	**Offer acceptance rate**	Salary alignment and candidate preparation quality
	Shortlist-to-interview rate	How often employers proceed with out recommendations
	Interview-to-offer rate	Strength of candidates reaching the final stage
	Rejection reason breakdown	Why candidates are not selected, categorised by stage
Activity	**Applications per job**	Demand signal - flags roles getting too few applicants
	Stage drop-off rates	Where in the pipeline candidates are being lost
	Active vs placed candidates	Overall platform conversion effectiveness
Data health	**Profile completeness rate**	Directly affects AI matching accuracy
	Jobs with fewer than 3 skills	Flags poorly-specified postings that will match badly
	Candidates inactive 90+ days	Pool staleness - triggers automated re-engagement nudge

4. Notifications

Every key event fires across all three channels simultaneously. Candidates and employers stay informed without needing to log in.

Event	Candidate	Employer	Admin	Channels
Candidate registers	✓ Welcome	-	✓ Alert	Email + Portal
Profile approved by admin	✓	-	-	Email + WhatsApp + Portal
Profile needs changes	✓ Reason	-	-	Email + Portal
Employer account approved	-	✓	-	Email + Portal
New application submitted	✓ Confirm	-	✓ Alert	Email + WhatsApp + Portal
Candidate shortlisted	✓	✓	-	Email + WhatsApp + Portal
Interview confirmed	✓ Details	✓ Details	-	Email + WhatsApp + Portal
Interview reminder (24 hrs)	✓	✓	-	Email + WhatsApp
Offer made	✓ Call	-	✓ Alert	Email + WhatsApp + Portal
Candidate not selected	✓ Note	-	✓ Alert	Email + Portal
Job posting submitted	-	✓ Pending	✓ Action	Email + Portal
Job posting approved & live	-	✓	-	Email + Portal
Job posting sent back	-	✓ Comments	-	Email + Portal

5. AI Matching System

Runs silently in the background after each profile update or new job posting. Score and full breakdown are visible to admin only - never to candidates or employers.

STAGE 1 - HARD FILTERS

Instant · No cost · Eliminates ~85% of pool

- ✗ Sector does not overlap
- ✗ Experience far outside range
- ✗ City mismatch + not open to relocation

→

STAGE 2 - SCORING

30–60 candidates scored per job · score out of 100

- ✓ Skills match 35 pts
- ✓ Experience level 25 pts
- ✓ Career summary 15 pts
- ✓ Salary compatibility 10 pts
- ✓ Notice period 8 pts
- ✓ Location 7 pts

> Sector is used only in Stage 1 as a hard elimination filter - not as a scoring component in Stage 2. This avoids double-counting. Once past Stage 1, detailed scoring focuses on fit within the sector.

Scoring breakdown

Component	Weight	Pts	How calculated
Skills match		**35 pts**	Semantic skill matching - partial credit for related skills
Experience level		**25 pts**	Candidate years vs job min/max range
Career summary		**15 pts**	Career summary vs role description text
Salary compatibility		**10 pts**	Expected CTC vs salary band - private both sides
Notice period		**8 pts**	Notice period vs target joining date
Location		**7 pts**	City match or open to relocation flag

Skill matching - semantic intelligence

Skills are matched by meaning, not exact text. A model runs locally on the server - no external API, zero per-call cost.

Candidate has	Job requires	Match	Why
SolidWorks	CATIA	**Similar CAD tools - semantically adjacent**	Partial
GMP	Good Mfg Practice	**Same concept, different wording**	Full

P&ID	Piping Diagrams	**Same term, different abbreviation**	Full
HPLC	AutoCAD	**Completely unrelated fields**	None
Angular	React	**Similar frontend frameworks**	Partial

Career summary matching: candidate summary and job role description are both embedded as vectors and compared semantically - capturing domain depth, scale, seniority, and intent that skill tags miss. This is especially powerful for senior roles where context matters more than a skills list.

6. Optional Add-on: AI Pre-fill

An optional module. Uses an external AI model to read uploaded documents and suggest field values, reducing onboarding time for candidates and for employers when creating job postings.

FOR CANDIDATES

Upload resume (PDF or DOCX)

↓

System extracts text from file

↓

AI identifies: skills, job titles, certifications, education, experience

↓

Suggestions appear next to each form field with one-click confirm

↓

Candidate reviews, confirms or edits, then saves

Nothing auto-saves. Manual fields are the source of truth.

FOR EMPLOYERS - JOB POSTINGS

Employer uploads document in the admin panel

↓

AI identifies: required skills, experience range, role description, salary hints

↓

Job posting form is pre-filled with suggestions

↓

Admin reviews, edits if needed, approves and publishes

Saves significant time when employers send JD documents instead of filling the form.

Cost - Claude Haiku AI model

Document	Input tokens	Output tokens	Cost per document
Candidate resume (2 pages)	~1,000	~300	**~$0.0004 (~₹0.03)**
Job description document	~600	~250	**~$0.0003 (~₹0.025)**

500 resumes = ~$0.20 total · 200 JDs = ~$0.06 total · Zero cost if add-on is switched off.

7. Technology Stack

bktalentconnect.com

React.js - Web Interface

Candidate Portal · Employer Portal · Admin Dashboard

Node.js + Express - Backend API

Auth · Jobs · Applications · Notifications · Pipeline Logic

Python Service

AI Matching · Skill Embeddings · Summary Vectors

SQLite Database

Users · Jobs · Applications · Scores · Notifications

DigitalOcean server · SES (email) · Meta Business API (WhatsApp)

8. Hosting and Running Costs

All costs below are billed to BK Talent Acquisition for transparency - separate from any development fees.

Fixed monthly costs

Item	Provider	USD/month	Notes
Server	DigitalOcean	**$7**	1 vCPU · 1GB RAM · handles ~500 active candidates · upgrade to $12 at scale
Domain	Namecheap	**~$1**	bktalentconnect.com · billed annually ~$12/yr
Storage for files (not required initially)	DigitalOcean Spaces	**$5**	250GB storage for files like resumes. Initially this can be stored on server, once storage fills, then we can get extra storage
SSL certificate	Let's Encrypt	**Free**	Auto-renewing HTTPS - no cost
Total fixed		**~$8/mo**	

Variable costs

Item	Provider	Pricing	Typical monthly cost
Transactional email	Amazon SES	**$0.10 / 1,000**	Pay-as-you-go · no minimum · 1,000 emails = $0.10 · 5,000 = $0.50
WhatsApp notifications	Meta Business API	**$0.006–0.008 /msg**	~4 msgs per application · 50 apps/mo = ~$1.50 · 200 apps = ~$6 · 600 apps = ~$18
AI resume pre-fill	Claude API	**~$0.0004 / resume**	Optional · 500 resumes = ~$0.20 total · zero cost if switched off
AI Job posting pre-fill	Claude API	**~$0.0003 / JD**	Optional · 200 JDs = ~$0.06 total · zero cost if switched off
AI matching engine	Runs on server	**$0**	No API · no per-match fee · fully covered by server cost

> Why Amazon SES? Pay-as-you-go with no monthly minimum
> 1,000 emails = $0.10 · 5,000 emails = $0.50 · Scales with usage, no upfront cost.
> Configure SPF + DKIM once for reliable delivery - standard one-time setup.

Total monthly estimate

Scenario	USD / month
Launch - low activity, minimal WhatsApp	**~$10–$14**
Early growth - moderate notifications	**~$14–$20**
Active platform - full notifications	**~$30–$50**
